Workshop on Simulation based training on cardiac Emergencies- A Hands on Approach

About the workshop

Cardiovascular diseases (CVDs) are the leading cause of death globally, taking an estimated 17.9 million lives each year. Cardiovascular emergencies are life-threatening disorders that must be recognized immediately to avoid delay in treatment and to minimize morbidity and mortality. These conditions present first to the emergency department and in many instances, there is only a narrow time window of opportunity—"Golden hour"—to save lives. Patient care in these emergencies requires invasive procedures with potential complications, and efficient professional team performance. "Time is gold" has always been the cornerstone of emergency management of these conditions and hence it is essential for health care practitioners to have thorough knowledge and skill to manage these important emergencies

Hand on simulation is a relatively new teaching strategy that allows learners to develop, refine, and apply knowledge and skills in a realistic clinical situation of cardiac emergencies as they participate in interactive learning experiences designed to meet their educational needs.

Time	Sessions
8.30am-9am	Registration & Pretest
9am- 9.30am	Primary and secondary assessment in cardiac emergencies
9.30am-10am	Basic life support
10am-10.30am	Basic airway management
10.30am-11am	Inauguration & Tea break
11am-11.5am	ECG Interpretation in cardiac emergencies
11.15am-11.30am	Advanced cardio vascular life support
11.30am-12Noon	Management of acute coronary syndrome
Hands on Sessions	
12 Noon-12.40pm	Primary and secondary assessment in cardiac emergencies
12.40pm-1.10pm	Basic life support
1.10pm-2pm	Lunch Break
2pm-2.40pm	Basic airway management
2.40pm-3.20pm	Advanced cardio vascular life support
3.20pm-4pm	Management of acute coronary syndrome
4pm-4.430pm	Post test &Valedictory

Registration Amount : Rs. 500
