

Central Assessment Program (CAP) for Evaluation

1. All the theory answer scripts are evaluated through the digital evaluation system of JSSAHER.
2. Double evaluation: Each theory examination answer script is subjected to two evaluations by independent eligible examiners.
3. Deviation evaluation: Theory answer scripts where the difference in the award of total marks between two examiners in the double evaluation is 20% or more of the maximum marks prescribed for the paper, shall be subjected to another evaluation by a third eligible examiner.
4. Computation of results: The average of total marks awarded by two examiners in the double evaluation shall be considered for the computation of results. In the event of answer scripts being subjected to a third evaluation, the average of the nearest two total marks awarded by the examiners shall be considered for the computation of results. Any decimals occurring either during individual total marks awarded by the examiner and/or after averaging shall be rounded off to the next higher value for the purpose of computation of results.
5. The marks awarded and the result declared after the above evaluation process shall be final and under no circumstances there will be a revaluation of the answer scripts.
6. Single evaluation: Single evaluation (i.e., evaluation carried out by only one eligible examiner) is carried out only for the prescribed subjects, wherein the marks awarded by the examiner shall be considered for the computation of the result. The students are permitted to apply for revaluation only for those answer scripts which have undergone a single evaluation. Application for the revaluation of answer scripts should reach the JSSAHER within 10 working days of the announcement of results on the website. The revaluation shall be carried out by an additional eligible examiner. If the difference in the award of total marks between two examiners after the revaluation is 20% or more of the maximum marks prescribed for the paper, it shall be subjected to deviation (third) evaluation. The computation of the result after revaluation shall be the same as specified in Para 4 above. The marks awarded and the result declared after the above evaluation process shall be final and under no circumstances there will be any further evaluation of the answer scripts.

7. Four evaluations: For the Medical Super Speciality/Medical PG courses (MD/MS/Diploma) listed under Postgraduate Medical Education Regulations of National Medical Commission and Dental PG courses (MDS) listed under MDS Regulations of Dental Council of India (DCI), each theory answer script will be subjected to four evaluations by independent eligible examiners. Theory answer scripts where the difference in the award of total marks between any two of the four examiners is 20% or more of the maximum marks prescribed for the paper, shall be subjected to another evaluation by a fifth examiner. The average of the nearest four total marks awarded by the examiners rounded off to the nearest higher value will be considered for the final computation of the result. The marks awarded and the result declared after deviation evaluation shall be the final and under no circumstances further evaluation shall be entertained.
8. Retotaling is permitted for theory answer scripts. Application for the retotaling of answer scripts should reach the JSSAHER within 10 working days of the announcement of results on the website. Reevaluation/retotaling shall not be permitted in respect of the scripts of Practical/Clinical/Viva-voce examination.
